CAS CCC is our desktop client that unlocks Trader Workflow Productivity, allowing Traders using a Turret to have the deepest of collaboration with their Microsoft Teams colleagues as well as having a client that enables Click-to-Dial on numerous Desktop Apps.

No Code by design, CAS CCC is ideal for clients seeking to ensure unlock the workflow capacity of Traders without the complexity of developing and maintaining a suite of API's

VALUE PROPOSITION

Why CAS CCC?

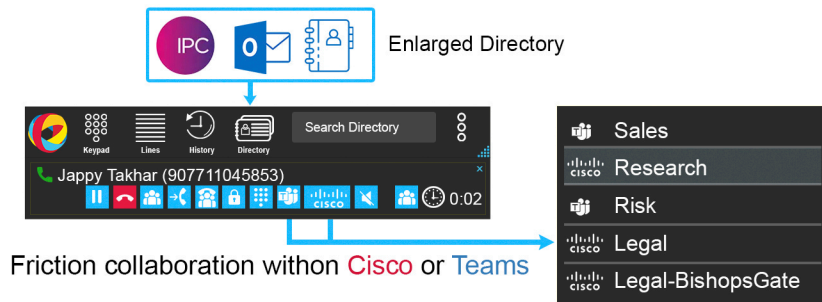

CAS CCC turbo charges turret users' collaboration with their Microsoft Teams colleagues without asking the trader to compromise on functionality. We've pushed the boundaries to ensure Traders can join multiple Microsoft Teams meetings simultaneously, which isn't possible for a native Microsoft Teams user.

Compelling ROI

100% of Traders calls remain on the turret when collaborating with Teams colleagues and/or joining MS Team meeting customers can avoid the cost and complexity of having to purchasing Microsoft Teams software recording licenses.

Introducing CAS CCC

Introducing CAS CCC working seamlessly
