

comitFS

Compliant Communications Solutions for the Financial Markets

comitFS

READY FOR BUSINESS

www.comitfs.com

Overview

“Stricter guidelines for regulated users and voice recordings means that firms must be able to monitor communication channels and ensure proactive reconciliation reporting is readily available for Compliance.”

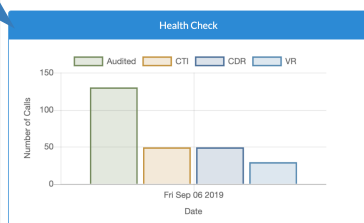

Benefits

- ▶ Morning Checks – ability to schedule calls to run in the morning before users come in.
- ▶ Validation of user configuration – validates users’ recordings from the regulated user database.
- ▶ Recorded voice quality check – ability to pull the voice quality metric from recorders.
- ▶ Daily summary of calls – summary of calls made on a daily basis and the recording status of them.
- ▶ Compliance – Provides feedback of any failures in voice recording or meta data for a call.
- ▶ Interfaces with common banking applications – Splunk, Corvil, ServiceNow and Siteminder.

Dashboard

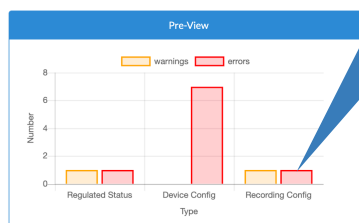

Health Check

Summary of test calls and results.

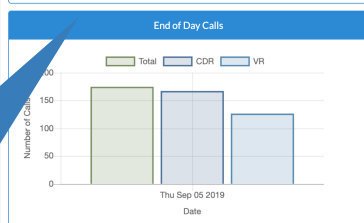

Pre-View

Comparison of user configuration across multiple systems.

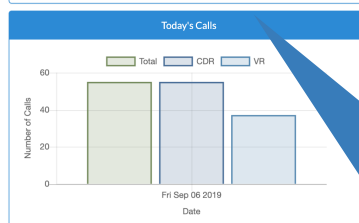

End of Day Calls

Summary of previous days calls and the recording status.

Today's Calls

Live view of all calls and their compliance status.

Schedule Name	Date	Time	Repeat	Pause	Run	Validate	Edit	Delete
